5-Gallon Stock . . . . .	23-29
Field Stock . . . . .	30-32

**TERMS**—5% discount allowed only on cash with order or where cash is paid to driver on delivery. Positively no discount allowed under any other condition. 30 days net. 5% interest added to past due accounts.

**DELIVERY**—Free Delivery to most points in Southern California. We do not pay transportation charges on shipments not covered by our free delivery service. To more distant points we will use safest and cheapest method unless specific instructions are given.

**PACKING**—On orders not delivered in our free delivery zone, less than carload lots, a packing charge of \$1.00 per hundred on lining out stock will be made and \$10.00 per hundred on one-gallon containers and 25c a piece on five-gallon containers or B. & B.

**CLAIMS**—Claims must be made immediately upon receipt of goods. If an error has been made by us, please notify us promptly, and we shall take pleasure in adjusting the matter. We do not guarantee plants to live. At no time will we be responsible for more than the purchase price of the stock ordered.

We carefully pack all stock, and make every effort to secure prompt and careful handling by the transportation company. Naturally, at this time, we are not always able to arrange for immediate transportation. However, our responsibility ceases upon delivery of stock in good condition to the transportation company. Claims for damage or delay in transit should be filed with the transportation company. In this connection we shall be glad to assist you in any way we can.

Your orders will be acknowledged promptly and shipments made as quickly as possible, so if your order is not acknowledged please advise us immediately. Sometimes, due to inclement weather, or the press of business and shortage of help, there may be a slight delay in shipping, but we assure you this will not be more than is absolutely necessary.

**THIS LIST CANCELS ALL PREVIOUS ISSUES**—Prices subject to change without notice.

**WE ARE A PINK TICKET NURSERY**—It certifies that stock from which shipment is made has been found free of pests not of general distribution in Los Angeles County and is released for planting in said county without further inspection.

**FILE FOR REFERENCE**—July 1, 1943.

---

---

*To Our Customers:*

In order that you may depend on us for an increased supply of stock to take care of a heavier demand next season, we have the largest crop in our 18 years of growing plants for the wholesale trade. There will be more than 500,000 one-gallon containers ready for the market by August 1st. In addition there are many thousands of two and five-gallon specimens and lining out stock. Our stock is in excellent condition, showing a vigorous growth as the result of regular applications of fertilizer.

Although we have this large stock at the present time, we would recommend that you place your order early. In making up your orders try to make them sufficiently large to cover your needs through the fall and spring seasons.

Apparently the transportation situation will become worse rather than better. By anticipating your orders early, we may make shipment during the summer and early fall so you will be assured of getting full delivery on time.

Yours for success,

H. E. ROSEDALE.

## CAMELLIAS

During the last few years we have been propagating Camellias on a large scale. Although we do not have the largest number of varieties to select from, we have tried to grow the kinds that are most popular with the public. Substantial quantities in all sizes are available. The plants are vigorously healthy and will make a fine showing in your nursery.

## CAMELLIAS

Variety	Description	Size	Price
<b>Adrian Lebrun.</b>	Very symmetrical double flowers of deep rose. Vigorous plant with glossy foliage .....	2" 1 gal. 5 gal.	\$ .15 .75 2.00

X

<i>Xylosma senticosa</i> .	Glossy green foliage, good for espalier .....	.25
----------------------------	---	-----

## 2-GALLON CAN STOCK

Please do not order less than 5 of one item.

Two-gallon cans have become very popular, since they save space and weight in shipping. The plants in these cans run slightly smaller than those in five-gallon cans and the weight is approximately one-third that of five-gallon cans. While we do not have a full line of varieties available, our supply of stock in this size is quite adequate.

Variety	Description	Price
<b>Abelia grandiflora.</b>	Blush pink flowers.....	.65

IMPORTANT

We urge you to place your  
order early in order  
to secure complete selection.

MONROVIA NURSERY CO.  
DUARTE and MYRTLE  
Monrovia, Calif.

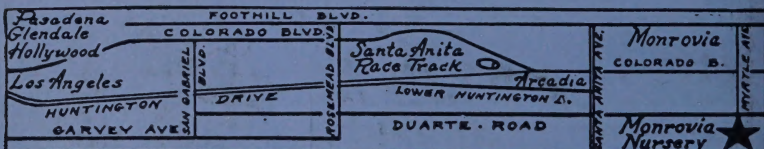

## MEYER LEMON

Never plentiful in the market, this hot item is a popular money maker. The fruit is edible, like regular lemons, and the flowers very fragrant. Be sure your stock of Meyer Lemon is sufficient to take care of your "War Garden" customers.

We offer only the dwarf kind, grown on its own root. An ornamental of unquestioned merit.
